

**FIELD SERVICE AUTOMATION SOFTWARE FOR INSPECTIONS & SURVEYING**

Manage Inspections, Audit Facilities and Create Quotes from a Single Platform

On any given day, you're busy juggling a multitude of things happening in the field. Whether it's a site inspection or survey, managing facilities or dealing with compliance, every day is a flurry of activity. How do you manage it all and how do you enable your field workforce to be a truly functioning mobile team?

The Field Squared Field Service Automation Platform is easily configurable to any type of inspection, survey or job, anywhere in the world. Best of all, everyone has access to the same, accurate information and customer documentation across the entire organization—from the field to the office and everywhere in between. Automate your inspection processes with the power of Field Squared.

**Key Benefits**

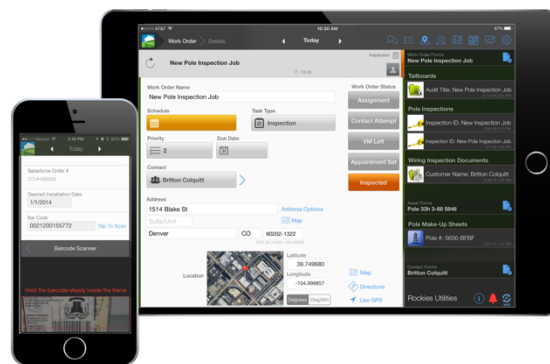

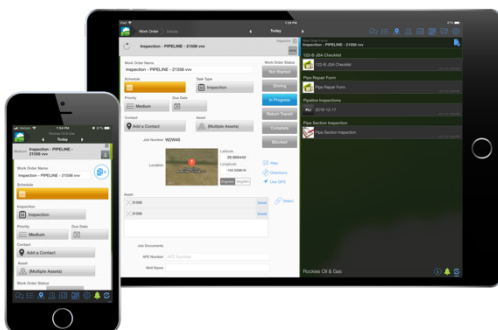

- Increase site inspection efficiency
- Automate manual or recurring processes
- Improve field data capture accuracy
- Manage inspections and surveys in real-time via GPS tracking

**Key Capabilities**

- Field Data Capture via Smart Forms
- Real-Time Notifications
- Online & Offline Availability
- Asset Management
- Analytics, Reporting & Business Intelligence
- Mobile Application
- Integrates with Back-Office Systems

**Increase Inspection or Surveying Efficiency Through Automation**

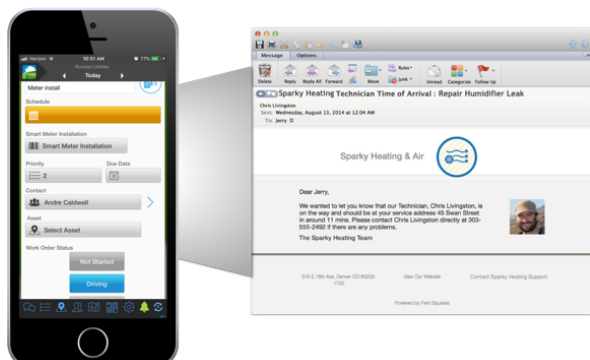

- Automate existing paper-based processes across inspection or compliance forms and safety checklists
- Instantly share results, create tickets and close work orders across your back-office systems
- Audit complex, multi-site facilities and create recurring schedules

**Access All Site Inspection History and Customer Documentation**

- Enable technician efficiency with all previous history for every inspection, site and customer at their fingertips
- Effortlessly maintain multiple service addresses for customers
- Quickly access engineering, asset, customer and documentation data in the field
- Visualize sensor data to ensure you stay within acceptable range
- Remain compliant and avoid fines via recurring automated environmental inspection tasks

## Improve Field Data Capture Accuracy with Digital Smart Forms

- Leverage auto-population of fields to eliminate manual data entry
- Quickly create quotes, PDFs and compliance documentation automatically
- Easily attach photos, markup and barcodes as well as add annotations to inspection forms
- Include site sketches with custom shapes and leader lines, including distances and angles

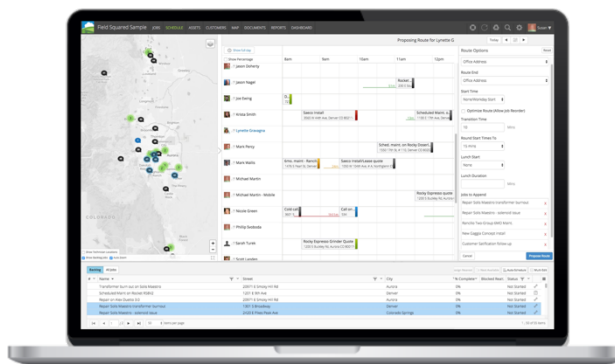

## Keep Your Customers In-The-Know with Real-Time Status Notifications

- Alert customers to late arrivals or schedule changes with real-time status notification
- Easily view customer details on a Map
- Manage inspections and surveys in real-time via GPS tracking

## Schedule, Dispatch & Optimize Routes

- Quickly schedule and route optimize work orders
- Minimize travel time, mileage and idling
- Match the right technician to inspections or surveys by skills matching, proximity, availability, and certifications
- Find and assign the nearest crew for last minute inspections or site surveys

## Real-Time Analytics and Reporting

- Generate summary reports that roll-up multiple forms and associated form data (i.e., assets, photos, barcodes)
- Analyze metrics to optimize installations and eliminate unprofitable assets
- Report KPIs such as time on site, travel time, job status, crew performance, and more

Thousands of people use Field Squared every day. Join the Crowd.
