Field Squared

FIELD SERVICE AUTOMATION SOFTWARE FOR CONSTRUCTION, ENGINEERING & INDUSTRIAL SERVICES

A Consolidated View Across Your Entire Field Operations: Schedules, Crews, Assets and More

In the world of construction, engineering and industrial services, operations are overtly complex. The inherent challenge involves the efficient coordination of activities. Lacking a consolidated view of technicians' schedules, the location of assets and trucks and understanding future availability to quote new projects, only compounds an already tremendous problem. How do today's construction and engineering services businesses level-up their operational efficiency?

Field Squared provides a global, consolidated view from which to manage your entire service operations. We take the guesswork out of scheduling technicians to job sites as well as enable real-time tracking across assets, equipment, parts and inventory. With Field Squared, your teams complete work on time and on budget, freeing up time to quote new projects and realize cashflow faster.
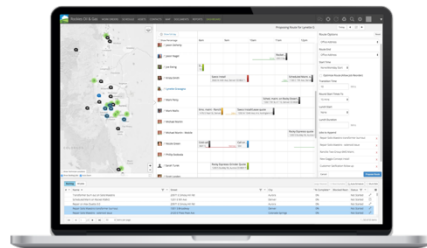

Key Benefits

- Consolidated view across operations
- Schedule crews and assets to jobs
- Track and manage assets and inventory
- Quote projects to realize cashflow faster

Key Capabilities

- Scheduling & Dispatching
- Mobile Forms
