Field Squared

FIELD SERVICE AUTOMATION SOFTWARE FOR SOLAR
Manage Your Assets, Crews and Customer Communications

Solar service businesses that install, manage and maintain residential or commercial systems, oftentimes use cumbersome spreadsheets, whiteboards or, yes, sticky notes to schedule work. Lack of a mobile field service management solution leads to significant data collection errors, repeat visits, inaccurate billing, the list goes on. Even tracking inventory of parts is a core challenge many businesses face.

Field Squared's all-in-one field service automation software puts your solar service business on the right track to level-up your operations. Scheduling service calls, tracking assets in real-time and utilizing digital mobile forms, ensures you are in control. With Field Squared's mobile field service software, the sky's the limit for your solar service business.

Key Benefits

- Schedule service calls
- Employ mobile forms for all work
- Capture photos and markup in the field
- Track crews via GPS in real-time

Key Capabilities

- Scheduling
- Mobile Smart Forms
- Online & Offline Availability
- Asset Management
- Real-Time Notifications
- Analytics, Reporting & Business Intelligence
- Mobile Application
- Integrate with Back-Office Systems

Gain a Consolidated View Across Your Entire Solar Service Operations

From one service work order to another, activities can vary. Given the multitude of things you need to keep track of, Field Squared makes it easy by consolidating everything in one solution. At any given time, you know what service orders are scheduled, where your technicians are in real-time, the location of assets and so much more.

Effortlessly Schedule Crews to Maintenance Service Calls

- Schedule crews from a consolidated view across your team
- Be proactive by setting up recurring preventative maintenance service schedules
- Effectively plan projects using satellite, street maps, driving directions, and GPS
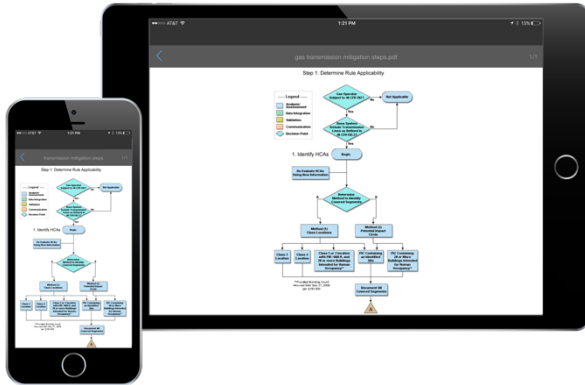

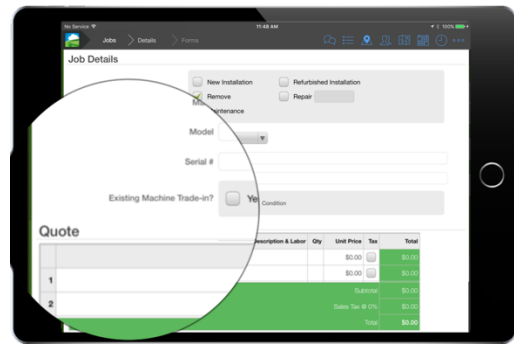

Provide Intuitive Mobile Forms for Any Solar Service Work

- Create installation, maintenance, audit, and inspection forms
- Employ skip-logic to quickly move technicians through tasks, without sacrificing data integrity
- Scan barcodes and capture photos
- Capture signatures on quotes, invoices and job completions

Quote Installation and Maintenance Contracts from the Field

Field Squared enables you to keep the quote-accept-complete cycle in motion, by leveraging automation at every stage of the process. Leveraging tools to quote projects from the field helps your crews move faster, beat the competition and realize revenue faster.
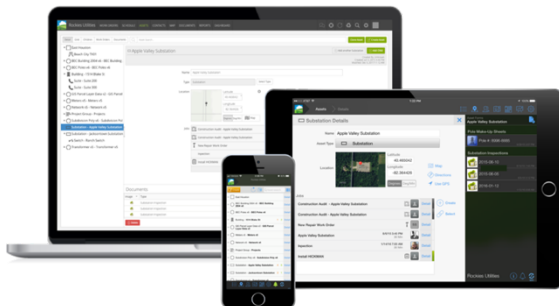

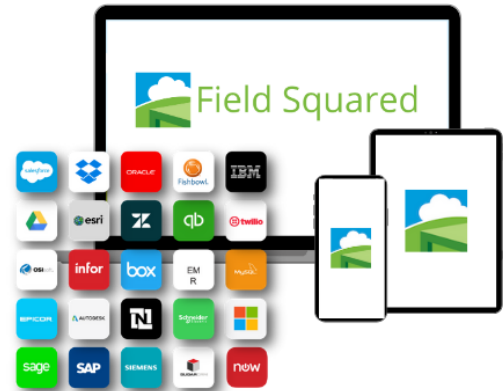

Provide Documentation to Empower Field Service Crews

With Field Squared, you can enable your crews to complete more service calls on-time, the first time. Provide your technicians with access to key documentation, including **decision-making tools, system design and specifications, AutoCAD drawings** or other information they need at their fingertips.

Integrate Third-Party Systems for a Single Source of Truth

We understand you have likely made investments in other third-party systems your business uses every day. That's why Field Squared provides a few different options to integrate the tools you need to get the work done. From out of the box integrations to custom solutions specific to the solar industry, bring your data together to make better decisions.

Manage and Track Assets in Real-Time

- Know where your assets are at all times
- View a full history of all activity against assets
- Integrate third-party systems, such as Esri ArcGIS, CRM, ERP, etc.

Thousands of people use Field Squared every day. Join the Crowd.
