

FIELD SERVICE MANAGEMENT SOFTWARE FOR OIL & GAS

Plan, Track and Manage Your Oil & Gas Field Operations

The ever-fluctuating nature of the oil & gas industry means you need more than just an edge to contend in a competitive market. With the Field Squared Field Service Management Process Automation Platform, you gain real-time insight across all your assets, technicians and every inch of the thousands of miles of pipeline and wells you maintain.

Field Squared is the industry's first unified Field Service Management Process Automation Platform. As a cloud-based SaaS solution, Field Squared allows enterprises to completely automate and streamline their field service operations and business processes, from the frontline to back-office systems.

Key Benefits

- Increase pad site inspection efficiency
- Automate manual processes on the rig or at the refinery
- Shorten project cycle times
- Optimize productive wells and eliminate unprofitable assets

Key Capabilities

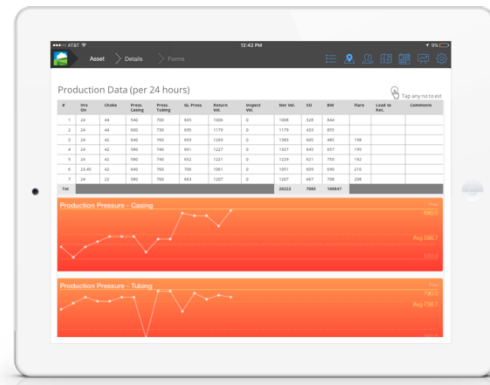

- Asset Management
- Field Data Capture via Smart Forms
- Real-Time Notifications
- Online & Offline Availability
- Analytics, Reporting & Business Intelligence
- Mobile Application
- Integrate with Back-Office Systems

Increase Pad Site Inspection Efficiency

- Automate existing manual processes across upstream, midstream and downstream operations
- Instantly share pressure readings, run tickets and create work requests across your back-office systems
- Optimize fleet management with scheduling and route optimization

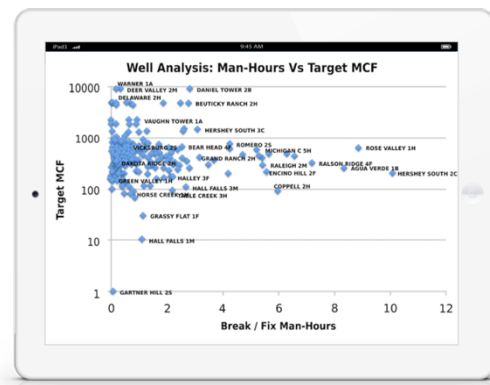

Automate, Manage & Mobilize Asset Monitoring

- Remotely monitor and respond to asset conditions (i.e., pressure, temperature, NOX/O2)
- Visualize sensor data to ensure you stay within acceptable range
- Remain compliant and avoid fines via recurring automated environmental inspection tasks

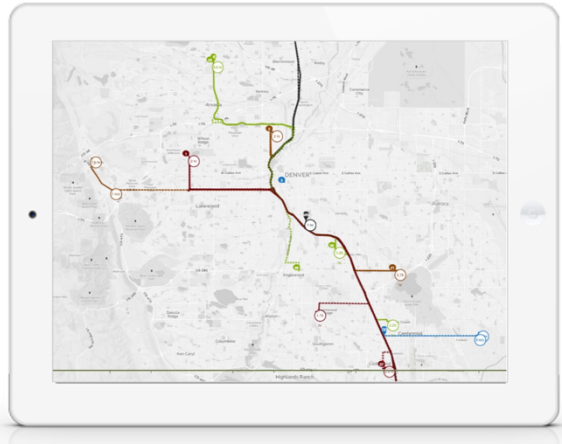

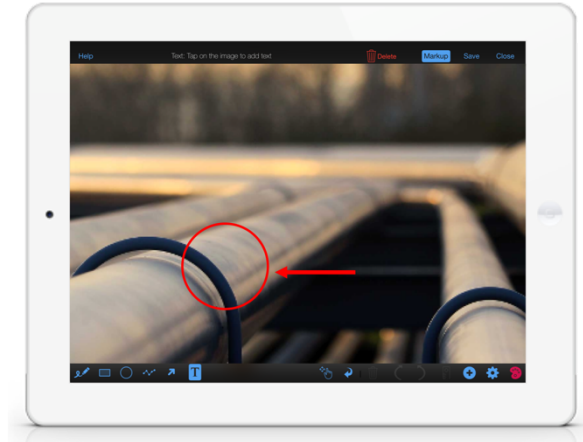

Measure Your Oilfield Service Performance

- Analyze well metrics to optimize and prioritize assets
- Understand fuel consumption rates
- Visualize sensor data to ensure you stay within acceptable range
- Analyze metrics to help reduce windshield time

Increase Field Data Capture Accuracy

- Capture field data and automate business processes with digital Smart Forms
- Online and offline availability, sync all data when connection is restored
- Easily include photos, markup, annotations, and site sketches with work orders and assets
- Pull lookup values and catalogues from third-party systems
- Instantly share data with teams, corporate, customers, and back-office systems

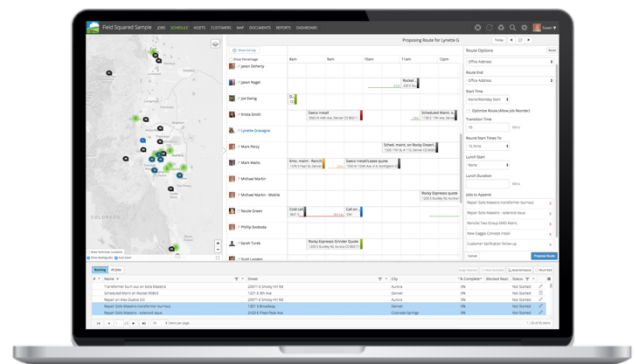

Schedule, Dispatch & Optimize Routes

- Minimize windshield time, mileage and idling
- Quickly plan routes to optimize efficiency
- Match the right technician to work orders with skills tagging
- Find the nearest crew for emergency orders

Track Progress and Crews in Real-Time

- Enhance first call resolution performance metrics with real-time GPS team tracking
- Access a historical replay of your field workforce locations and work orders
- Improve customer service experience with automated status alerts
- Effectively plan projects using satellite photos and street maps, driving directions and GPS

“ We’ve seen over a 4000% increase in productivity since rolling out Field Squared.

William Morgan, Implementation Specialist at Great Plains Gas
