

FIELD SERVICE MANAGEMENT SOFTWARE FOR POWER & UTILITY

**Field Data Capture, Scheduling & Improved Customer Communications**

From managing inspections, maintenance or repairs, service orders and meter installations, your field technicians have enough to think about in their day-to-day jobs. With accurate real-time GPS-based crew tracking, scheduling and route optimization and full work order history, Field Squared enables your field technicians and helps you be proactive with up-to-the-minute information at your fingertips.

Field Squared is the industry's first unified Field Service Management Process Automation Platform. As a cloud-based SaaS solution, Field Squared allows enterprises to automate and streamline their field service operations and business processes, from the field and corporate office to back-office systems. Save time, reduce costs and increase efficiency with Field Squared's unified field service management platform.

**Key Benefits**

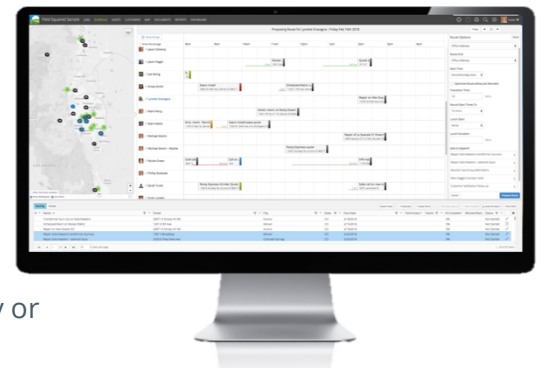

- Optimize and schedule work orders
- Capture photos and markup in the field
- Track crews via GPS in real-time
- Send real-time status updates

**Key Capabilities**

- Field Data Capture
- Work Order Management
- Scheduling, Dispatch & Route Optimization
- Online & Offline Availability
- Asset Management
- Analytics, Reporting & Business Intelligence
- Mobile Application
- Integrations

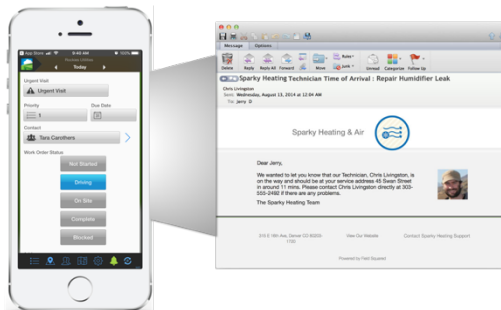

**Effortless Scheduling, Dispatch and Route Optimization**

- Optimize field service routes in real-time
- Reduce truck rolls and minimize windshield time
- Schedule, track and create work orders, assets and customers based on location
- Coordinate thousands of jobs per day or over multiple days and crews

**Improve Your Field Service Customer Experience**

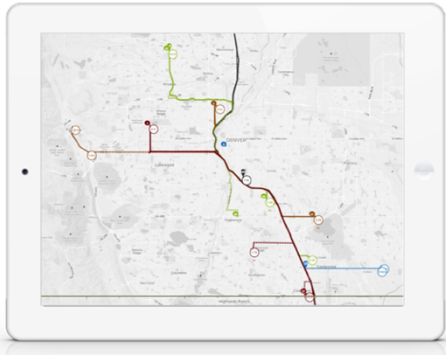

- Gain control of late arrival and rescheduling situations
- Notify customers in real-time of a technician's status
- Email customers from the job site with work order related documents

**Increase Field Data Capture Accuracy**

- Easily include photos, markup, scan barcodes, and add site sketches to work orders and assets
- Reduce truck rolls, duplicate trips, lost paperwork and callbacks
- Online and offline availability
- Pull lookup values and catalogues from third-party systems

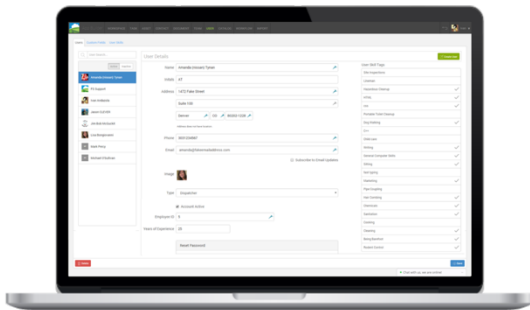

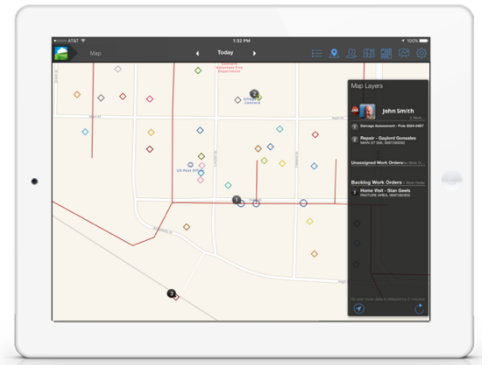

### Track Work Orders and Crews in Real-Time

- Easily manage outage jobs with distributed crews
- Find the nearest technician for emergencies
- Track time on site, unscheduled stops, speeding, and crew metrics
- Enhance first call resolution performance metrics with real-time GPS team tracking
- Access a historical replay of your field workforce locations and work orders

### Manage and View Assets in the Field

- Capture work orders and documents against assets
- Map and view asset locations and data
- Two-way sync data from your back-office systems to your field technicians
- Track on-site history of all activity for every asset

### Assign Work Orders by Job Skills

- Easily create job types and skills and assign technicians to associated work orders
- Create automated alerts before certifications or training requirements are set expire
- Effortlessly match proper skill sets to work orders, increasing work order completion rates

### Real-Time Analytics, Reporting & Business Intelligence

- Analyze asset metrics to optimize installations or maintenance and eliminate unprofitable assets
- Connect cross-departmental information to make comprehensive data-based decisions
- Rank sites by correlating on-site job time to asset performance

Thousands of people use Field Squared every day. Join the Crowd.
